Term Collagen Response In Aging Skin**

BioFusionary

2016

You used to turn heads, but now you're the woman that's fading into the wallpaper.

When you're gazing in the mirror, the burning question on your mind may be how to get back that healthy glow from the ravages of time. But for those of us who've gone through it, the picture of prickly needles, sharp knives and painful burns are all too fresh in our memory.

You hesitate and you're unsure of how to go forward.

Most of us aren't searching for just a "more youthful" face, but a radiant suppleness that only certain treatments can give: **THE GLOW, THE HEALTHY APPEARANCE AND THE FIRMNESS THAT LASTS.**

In the quest for youthfulness, you've probably spent a lot of time and money in and out of treatment offices, doctor's procedures, medical spas and consultations only to end up frustrated and disappointed.

It's easy to look into the mirror and ask "Is it hopeless? Should I just give up?" Sometimes it feels like for every step forward you take two steps back.

Well, forget about the arsenal of cosmetic injectables or the chemical peels that leave their mark.

Now you can age without giving it all up. You can get back the rosy cheeks, the plump skin, the luminous vitality of youth.

*It's about getting realistic results...
results that mean you'll be one of those women
whose age isn't obvious.
You can't quite tell.
She could be 35, she could be 55.*

Aging gracefully is one thing, but aging wisely is better.

If you're still reading this, it means you are one of those women that values the way you look, you value your health and you value the way your friends and family see you. You're not happy to let your age happen to you.

And it means you're not ready to give up. You have a lot of fight left in you. You know elegance is not about being noticed, it's about being remembered.

Our skin's reaction to **the ravenous effects of aging** - moisture depletion, sagging, dryness, creasing, crepey-ness and more - can be treated to restore youthfulness through biomagnetic induction.

Now you can erase decades from your skin without painful, risky and expensive medical procedures.

Biofusionary is a biomagnetic induction treatment. This means that the lower layers of the skin which contain collagen tissue are stimulated with a high level of heat. The result? An instant, noticeable smoothing and tightening of the skin and an on-going improvement over the next 3-4 months. Such instant results are a product of Biofusionary's new technology.

Before

After

Stimulating Collagen Renewal with High Heat

To understand how Biofusionary works it's important to understand the skin's natural healing response.

When heat reaches the deep layers of the skin and underlying muscle, an instant healing response is triggered. Biofusionary uses rapidly changing magnetic fields to deliver high heat to these tissues.

This heating triggers the body's natural heat shock healing and repair mechanisms to respond by building a firmer, thicker and more toned matrix.

You're getting the benefits of your body's highly effective natural healing response, but avoiding the injury and discomfort that would normally be needed to trigger it.

When Biofusionary generates this heat deep within the skin – the skin is “tricked” into an intensive healing process.

That means dramatic improvements, instantly and over the course of coming months, without any damage.

This healing response triggers a realignment of the muscle tissue to restore skin tone, and also prompts a collagen response that “keeps on giving” as the skin regenerates itself.

No Pain, Just Gain?

The advanced technology used in Biofusionary means that these instant and powerful results can be achieved without damage or downtime. It is **painlessness and real results**- a combination virtually nonexistent in other effective anti-aging therapies.

After long term development from top ranking biomedical innovators and the **trusted clearance of the FDA** – the anti-aging treatment with rapid results is here.

Developed specifically to achieve natural results for aging skin, with a dramatically lifted and toned appearance, there's nothing like the Biofusionary for glowing skin and instant vitality.

*After A Decade In Development, It's
Being Released To Colorado Markets First*

The Biofusionary Bebe is the final product of 10 years of development by Colorado based biomedical inventor, Dr. Kevin Marchitto.

After \$4M in its development and a seal of clearance by the FDA, it's finally ready for release.

*Imagine having an on-demand solution to aging
that doesn't hurt, doesn't have any downtime
and actually works.*

All About Biofusionary

Scientifically Proven- Incredible Results & FDA Clearance

Start with one treatment

Users of Biofusionary usually begin with a simple introductory treatment to experience the effects and then discuss a tailored treatment plan. Users usually experience an immediate rosy flush to the skin, and a firming that grows into a visible glow by the time they leave their treatment.

A Gentle Application Of Heat, From the Inside Out

Because the Biomagnetic Induction generates the heat from the lower layers of the skin, no initial ‘feeling’ of heat is noticeable. The wand is first placed over the skin in 2-10 second increments, then slowly moved around the treated area until every inch is covered. As the wand is placed more intensively and for longer periods on the desired area, the heat builds up over the course of a treatment and sneaks up on the body’s nerves from underneath, prompting the wand to be left on the skin for shorter and shorter periods.

It can feel “hot” at the end of the longer treatment, similar to a hot stone treatment, but the heated feeling grows from underneath as the wand is used. However, when the wand is pulled away, the heat subsides almost instantly. It’s never a ‘burning’ sensation (like in Chemical peels or fraxels) it’s simply an intensifying, pleasant warmth from beneath the skin.

Great Results “Over-Lunch” : 25 to 40 minutes... is all it takes.

The Biofusionary difference is in quick visits with zero downtime. We call them ‘over-lunch’ results because some of our returning clients prefer to pop in for a 25 min touch-up appointment over lunch.

With no negative visible effects of treatment, just a visibly lifted appearance with glowing skin, it’s the choice of busy women. The first few Biofusionary treatments usually last a 30-40 minutes, with touch-up and maintenance visits being even quicker.

3-4 treatments

As incredible as it sounds, the Biofusionary is able to start noticeable improvement instantly after only one treatment.

However, 3-4 treatments is when the real magic starts to happen and the real efficacy of localized heating starts to shine.

How does it feel on your skin?

When you experience the Biofusionary treatment, the heat generating wand is applied to the skin and generates heat down at the lowest layers of the dermis. Initially, all you feel is a gentle warmth as your skin responds.

After multiple passes upon the same area, the heat begins to build up in the skin. As the heat reaches the nerves in the outer layer of the skin, the sensation of warmth shifts to more of a direct heat. It feels similar to an electric blanket or the initial application of a hot stone. The heat rapidly dissipates as the wand is removed. It has been described as a reverse hot stone massage - the feeling of heat is not immediately noticeable, but as the Biofusionary begins to work it's magic more intensely, the gentle warming from beneath the skin grows into a more direct heat.

“ I thought it might hurt, but as the wand slowly worked its way around the skin, it was this really pleasant heating just like a hot stone massage. It got hotter the longer it was on, but it never hurt. Big change from what I'm used to! It's good though, because I do feel it ENOUGH to know that it's working! ”

You'll notice results from Biofusionary as soon as your treatment is done. Women have noted an immediate lift that improves with time and the skin becomes more radiant in weeks to come.

It is radiance that comes from the Biomagnetic induction prompting blood flow and resulting in an immediate and visible glow. The deeper, longer-lasting effect of Biofusionary takes place, too, as the new collagen regeneration process begins.

This radiance usually lasts through the first day or so yet as the glow softens, the firming and lifting begin to take over.

An amazing point of evidence of the efficacy of the machine is the side-by-side notable changes. You can examine a patient mid-treatment and view the comparative difference of the side of the face 'touched' by the Biofusionary and the untreated side.

“

Phenomenal, it works!”

”

Dr. Robert Moreno

As the underlying collagen continues to realign beneath the skin, the results of Biofusionary continue to improve for up to 6 months, and maintain through 9-12 months.

The treatment doesn't "disappear", but as skin continues to age, like many other anti-aging options on the market, skin requires subtle touch ups or follow up treatments.

However, these treatments appear to have the same lasting power as the initial treatments making Biofusionary a viable annual option for radiant skin. Zero burning, peeling, swelling or downtime. Best of all, the results really do look natural.

Biofusionary Changes How You View Anti-Aging

Instant results. No downtime.

Before

After

Imagine not having to 'book in' treatments weeks (or months ahead) and plan the rest of your life around your appointment? Imagine never having to avoid social events and dinner parties until your chemical peel "heals up." No more skipping charity benefits entirely because you're waiting for bruising to clear up.

For many of us, this is our reality, but Biofusionary wants to introduce us to a **new one**.

While Biofusionary erases the need for downtime, it erases the need for painful and ineffective treatments, too. You won't have to plan your life around a treatment, endure a level of pain for a small payoff or look in the mirror wondering how to squeeze another invasive treatment into your busy schedule.

You'll never have to wonder "why did I do this to myself?" after a not-so-great chemical peel.

Biofusionary is ideal for lunchtime touch ups too, before a big night out or a speaking engagement. It's ideal for amping up the extra "wow" factor before a big day or night.

Here are some of the incredible benefits we've seen from the Biofusionary:

- **No downtime:** instant perks and a visible glow so that you can get back to life right away.
- **Immediate visible results:** so that you won't be waiting to see a change.
- **Collagen Realignment that improves over time** so that your treatment lasts and improves, not fizzles out.
- **Gentle Process with Dramatic Results:** minimal discomfort and painless options available. That's almost nonexistent in any other effective anti-aging treatment.
- **Better and longer lasting results** than virtually any other anti-aging option available.
